Submitted for orders

C.S.
19/7/29

2 The scheme is worth a trial. But I have an suggestion to offer. While I agree to the proposal to have the Pharmacy and Sales depot worked independently, it is not desirable to keep the transactions, the latter not of financial account. The opening of a Savings Bank account will not help to the exercise of proper control over the connected transactions.

3 Provision may be made in the budget for supply of medicines on payment of the cost price to them who desire and above Rs 500 per annum and who are entitled to ask for them, the free supply being curtailed as at present. The sale proceeds should be credited to adjustments of the amounts drawn from the Govt for running the Sale depots

27/12

The scheme for developing the Pharmacy Branch of the Ayurvedic and Unani College and Hospital, recommended by the Muzrai Commissioner may be sanctioned.

I agree with the Financial Secretary that it is not advisable to open a Savings Bank account for conducting the financial transactions of the scheme. I think it would be better if an ordinary deposit account is permitted for this purpose. A separate head which may be called "the Ayurvedic and Unani College and Hospital Pharmacy Fund" might be opened and all receipts paid into it and all sums required for disbursement drawn from it. The preparation of medicines for dispensing in Hospital and for sale to the public will have to be arranged for as one continuous and combined operation to get the best results from the scheme and accordingly the Hospital grant of (Rs 90 x 12) Rs 1,080 per annum for medicines might be credited to the deposit account at the beginning of each year to facilitate the financing ~~of buying~~ purchase of the required materials, manufacturing all medicines and stocking them in required quantities. The Pharmacy may be required to issue to the Hospital medicines of the value of Rs 1,080 per annum at cost price. The disposal of medicines in excess of this issue

WD 01684—GPB—30 000—20-1-29

Serial No.

to the Hospital will be by cash sales to the public.

7 The deposit account may be operated upon in the usual course by drawing on A.C.Bills and accounting for drawings on D.C.Bills.

8 Proper cash and stock accounts should be maintained for the Pharmacy Fund and for the Sale Depot which is proposed to be worked as a separate institution. Stock should be required to be taken once in each half year and a balance-sheet of the Fund prepared for each year.

9 Medicines for supply to the public may be moderately priced and the public encouraged to buy them.

10 A report might be required to be submitted on the 15th July 1930 as to how this scheme has worked in the year 1929-30

11 If the Financial Secretary is agreeable to the arrangement proposed above, orders may be issued approving of the Muzrai Commissioner's recommendation with the above modifications. His letter as well as the note of the Vice-President of the Ayurvedic and Unani College and Hospital Committee might be read in extenso in the preamble of the order.

PROVINCIAL SECRETARY
4 JULY 1929

OFFICE OF THE MUZRAI COMMISSIONER IN MYSORE

Bangalore, ... 192..

No. 1893 Rv-3
28-6

FROM

The Muzrai Commissioner in Mysore.

To

SIR,

In forwarding herewith [illegible] dated 4th May 1929 received from the Vaidyapatasala Committee of [illegible] College Committee to the Government [illegible] to the College, I have the honour to state that the annual grant of Rs.[illegible]/- is being given at present both by the Government and Local Boards to the Ayurvedic Vaidyapatasala for the purpose of preparing medicines to the public, the remaining [illegible] Pharmacy attached to the College for the purpose of [illegible] the students. As there has not been sufficient [illegible] medicines in the Pharmacy of the College [illegible] for sale for which there is [illegible] no extra cost either to Government or Local Fund and [illegible] interfere with the existing [illegible] scheme, enclosed). The [illegible] kept distinct from each other, [illegible] to the extent of medicines [illegible] Since, as observed by the College Committee, (Vide [illegible] No.iii enclosed) there is [illegible] Ayurvedic Vaidyas to [illegible] all medicines under Ayurvedic System [illegible] of a Pharmacy on the lines [illegible] really [illegible] to convert this into [illegible]

[illegible]

Arawelli and Vnara Taluks, Madras.

[illegible] & Prop. Medicines are prepar[illegible] and [illegible] produced for sale to the public, [illegible] available. During the hours when the Dispensary of the pharmacy, it has to be [illegible] or vend particular medicines to meet [illegible] are left [illegible] When the medicines are exhausted, [illegible] medicines are prescribed, [illegible] would otherwise get discharged [illegible] Dispensary some time later. [illegible] people prefer to buy the prescribed medicines [illegible] the Dispensary day after day [illegible] therefore, incumbent on [illegible] place the pharmacy on a [illegible]

To remedy the existing defect, it is [illegible] the resources of the Pharmacy [illegible] upon extra funds from Government or local Boards, [illegible] start a sales depot, and offer for sale the [illegible] the medicines prepared out of the [illegible] and deal the whole concern on a commercial [illegible] medicines will be given with reference to [illegible] other materials used and the labour actually required [illegible] preparation.

The Pharmacy and the sales depot will be [illegible] each other and the latter will be debited [illegible] of the medicines taken out for sale from the [illegible] will be reduced as sums are credited with [illegible] or medicines are returned.

The sale rate of the [illegible] at double the cost in consideration of [illegible] contingent charges etc., though

sold in the market is 1 to 4 times the actual cost. The amounts so realised by sale, will be lodged in the Government savings - Bank in the name of the Vice-President and will be utilised -- exclusively for the preparation of medicines and as a supplementary resources/ in addition to the usual grant of Rs.50/- per mensem. As the labour on incidental charges relative to the preparation of small as well as large quantities of important medicines is almost the same, it may perhaps be possible to reduce the value of medicines with the development of the Depot.

With the successful working out of this scheme, the ----- following advantages are expected to accrue:-

1. The attendance at the Ayurveda and Unani Dispensaries can be regulated, as the well-to-do class of people prefer to buy medicines for use for several days at a time instead of attending the Hospital every day.
2. The needs of the poor can be served to a greater extent and more costly and efficacious medicines may be made available for them as Rs.50/- plus the profits of the sale depot would be available for preparation of -- medicines.
3. Genuine patent medicines prepared on scientific lines can be made available to the public.
4. In course of time, the sales depot, can be converted into a central pharmacy, wherefrom medicines can be supplied to all Government District Board Ayurveda and Unani Dispensaries.
5. Only cash sales will be permitted and the sale depot can be closed at any time that private enterprise comes forward to prepare and supply reliable medicines. A similar arrangement is well established in the Sri Muthuraihi Ayurvedic Samajam hospital, a philanthropic concern where the free distribution of medicines to the poor is financed almost entirely out of the --- profits of the commercial section of the pharmacy, there being only a small grant to the institution. The pharmacist of our Ayurvedic College is well ---

well conversant with that system.

Early question to the Schedule requested.

111. Development of the pharmacy section.

Resolution- Resolved that it is highly desirable [illegible] organise and develop a Pharmacy Section in the College, as this is essential for the following reasons :-

(1) to demonstrate the preparation of all Ayurvedic [illegible] to the students,

(2) to have a central depot for the sale of pure and genuine preparations to mofussil Vaidyas and Dispensaries, as the popularity of the Ayurvedic System and the mofussil depends mostly on the facility to obtain pure genuine preparations at reasonable cost and within reasonable time,

(3) to serve as a depot where the public may get their prescriptions from local Vaidyas compounded correctly.

The committee desires to emphasise the need for [illegible] the pharmacy section as the Ayurvedic Vaidyas have [illegible] central store to indent upon or even big firms [illegible] where all the standard medicine of the Ayurvedic system are available.

Resolved further that a qualified Ayurvedic [illegible] Malabar may be entertained on the vacant place of [illegible] on 60-4-80 to work in the pharmacy section. He will incidentally be able to demonstrate the [illegible] current in Malabar.

(Annexure)

Letter No. 1893 of 1928-29 dated 4th July 1929 from the Muzrai Commissioner in Mysore, Bangalore, to the Secretary to Government, Financial Department.

In forwarding herewith copy of letter No. M.T.131 dated 17th/ 20th May 1929 received from the Vice-President of Ayurvedic and Unani College Committee re the development of the Pharmacy Section attached to the College, I have the honor to state that a monthly grant of No.90/ is being given at present both by the Government and Local Boards to the Ayurvedic Dispensary at Mysore for the free supply of medicines to the public, the medicines being prepared in the Pharmacy attached to the College for purposes of demonstration to the students. A scheme has now been formulated to manufacture medicines in the Pharmacy on a large scale and make them available for sale for which there is much demand. This is stated to involve no extra cost either to Government or local funds and in no way interfere with the Dispensary (vide copy of the note detailing the scheme, enclosed). The Pharmacy and the sales Department will be kept distinct from each other, the sales Depot being debited in value to the extent of medicines taken out for sale from the Pharmacy. Since, as observed by the College Committee, (vide copy of resolution No. iii enclosed) there is no central store at present for the Ayurvedic Pandits to indent upon or even a big firm in Mysore where all medicines under Ayurvedic ~~Section~~ System can be obtained, the development of a Pharmacy on the lines indicated by the Vice President will really serve a great need and in course of time it will be possible to convert this into a central Pharmacy where from genuine medicines can be supplied to all Government, District Board Ayurvedic and Unani Dispensaries in the State, at a cheaper cost without at the same time any extra cost to Government, I beg to recommend that the scheme may kindly be sanctioned.

I solicit favour of early orders of Government.

N O T E

Development of the Pharmacy attached to the Government Ayurvedic and Unani College, Mysore.

The Pharmacy section is open to all classes of people Rich and Poor. Medicines are prepared to the extent of the grant of Rs. 90/- sanctioned for the purpose, and are being distributed as far as available. Due to the limited quantity of medicines at the disposal of the Pharmacy, it has not been possible to continue to prescribe or vend particular medicines to deserving patients, till they get completely cured. When the medicines are exhausted, other available medicines are prescribed, the result being that some patients who would otherwise get discharged earlier are compelled to visit the Dispensary sometime longer. The better and intelligent class of people prefer to buy the prescribed medicines instead of going to the Dispensary day after day and wasting their time. It is, therefore, incumbent in the interest of the ~~Ayurvedic~~ Ayurveda and Unani to place the Pharmacy on an efficient footing.

To remedy the existing defects, it is necessary to augment the resources of the Pharmacy Section. To do so without indenting upon extra funds from Government or Local Boards, it is proposed to start a sales Depot, and offer for sale the required quantity of the medicines, will be fixed with reference to the value of drug and other materials used and the labour actually required in the preparation.

The Pharmacy and the sales Depot will be independent of each other and the latter will be debited in value to the extent of the medicines taken out for sale from the Pharmacy. This debit will be reduced as funds are credited with the sale of medicines, or medicines are returned.

The sale rate of the medicines in the Depot will be fixed at double the cost in consideration of technical supervision, contingent charges &c. though the price of similar medicines sold in the market

prepared out of the monthly normal grant of Rs. 90/- and deal the whole concern on a commercial basis. The cost of medicines

is 3 to 4 times the actual cost. The amounts as realised by sale, will be lodged in the Government Savings Bank in the name of the Vice-President and will be utilised exclusively for the preparation of ~~medicines~~ medicines and as a supplementary resource in addition to the usual grant of Rs. 90/- per mensem. As the labour and incidental charges relative to the preparation of small as well as large quantities of important medicines is almost the same, it may perhaps be possible to reduce the value of medicines with the development of the Depot.

With the successful working out of this scheme, the following advantages are expected to accrue:-

1. The attendance at the Ayurveda and Unani Dispensaries can be regulated, as the well-to-do class of people prefer to buy medicines for use for several days at a time instead of attending the Hospital every day.

2. The needs of the poor can be served to a greater extent and more costly and efficacious medicines may be made available for them as Rs. 90/- plus the profits of the sale depot would be available for preparation of medicines.

3. Genuine patent medicines prepared on scientific lines can be made available to the public.

4. In course of time, the sales depot, can be converted into a Central ~~control~~ pharmacy, wherefrom medicines can be supplied to all Government, District Board, Ayurveda and Unani Dispensaries.

5. Only cash sales will be permitted and the sale depot can be closed at any time that private enterprise comes forward to prepare and supply reliable medicines. A similar arrangement is well established in the Cheruthurthi Ayurvedic Samajam Hospital, a philanthropic concern, where the free distribution of medicines to the poor is financed almost entirely out of the profits of the commercial section of the pharmacy, there being only a small grant to the institution. The pharmacist of our Ayurvedic College is well conversant with that system.

Early sanction to the Scheme is requested.

No. 1182-3—Muz. 15-29-2, dated 10—14th December 1929.

NOTE.

Development of the Pharmacy attached to the Government Ayurvedic and Unani College, Mysore.

The Pharmacy section is open to all classes of people rich and poor. Medicines are prepared to the extent of the grant of Rs. 90 sanctioned for the purpose, and are being distributed as far as available. Due to the limited quantity of medicines at the disposal of the Pharmacy, it has not been possible to continue to prescribe or vend particular medicines to deserving patients, till they get completely cured. When the medicines are exhausted, other available medicines are prescribed, the result being that some patients who would otherwise get discharged earlier are compelled to visit the Dispensary sometime longer. The better and intelligent class of people prefer to buy the prescribed medicines instead of going to the Dispensary day after day and wasting their time. It is, therefore, incumbent in the interest of the Ayurveda and Unani to place the Pharmacy on an efficient footing.

To remedy the existing defects, it is necessary to augment the resources of the Pharmacy Section. To do so without indenting upon extra funds from Government or Local Boards, it is proposed to start a Sales Depot, and offer for sale the required quantity of the medicines prepared out of the monthly normal grant of Rs 90 and deal the whole concern on a commercial basis. The cost of medicines will be fixed with reference to the value of drug and other materials used and the labour actually required in the preparation.

The Pharmacy and the Sales Depot will be independent of each other and the latter will be debited in value to the extent of the medicines taken out for sale from the Pharmacy. This debit will be reduced as funds are credited with the sale of medicines, or medicines are returned.

The sale rate of the medicines in the Depot will be fixed at double the cost in consideration of technical supervision, contingent charges, etc., though the price of similar medicines sold in the market is three to four times the actual cost. The amounts as realised by sale, will be lodged in the Government Savings Bank in the name of the Vice-President and will be utilised exclusively for the preparation of medicines and as a supplementary resource in addition to the usual grant of Rs. 90 per mensem. As the Labour and incidental charges relative to the preparation of small as well as large quantities of important medicines is almost the same, it may perhaps be possible to reduce the value of medicines with the Development of the Depot.

With the successful working out of this scheme, the following advantages are expected to accrue:—

1. The attendance at the Ayurveda and Unani Dispensaries can be regulated, as the well-to-do class of people prefer to buy medicines for use for several days at a time instead of attending the Hospital every day.
2. The needs of the poor can be served to a greater extent and more costly and efficacious medicines may be made available for them as Rs. 90 plus the profits of the sale depot would be available for preparation of medicines.
3. Genuine patent medicines prepared on scientific lines can be made available to the public.
4. In course of time, the Sales Depot, can be converted into a central pharmacy, wherefrom medicines can be supplied to all Government, District Board, Ayurveda and Unani Dispensaries.
5. Only cash sales will be permitted and the Sale Depot can be closed at any time that private enterprise comes forward to prepare and supply reliable medicines. A similar arrangement is well established in the Cheruthurthi Ayurvedic Samajam Hospital, a philanthropic concern where the free distribution of medicines to the poor is financed almost entirely out of the profits of the commercial section of the pharmacy, there being only a small grant to the institution. The pharmacist of our Ayurvedic College is well conversant with that system.

Early sanction to the Scheme is requested.

T. G. RAMA IYER,
Vice-President,

No. 1182-3—Muz. 15-29-2, dated 10—14th December 1929.

Letter No. N. T. 131, dated 17—30th May 1929, from the Vice-President, Ayurvedic and Unani College Committee, Mysore.

With reference to the development of the Pharmacy Section of the College, referred in Resolution No. 111, dated 7th November 1928 of the College Committee (copy enclosed), I have the honour to state that the question was again considered by the Committee in their meeting held on 4th May 1929, and the proposal to manufacture medicines on a large scale to admit of their sale was adopted, as per enclosed copy of Resolution. The details of the scheme are indicated in the notes, hereto appended. I request that the same may kindly be sanctioned at an early date, to enable the scheme being worked out

Proceedings of the meeting of the Committee of the Ayurvedic College held at the College, on 17th November 1928.

111. Development of the Pharmacy Section

Resolution.—Resolved that early steps be taken to organize and develop a Pharmacy Section in the College as this is essential for the following reasons.—

(1) to demonstrate the preparation of all Ayurvedic medicines to the students;

(2) to have a Central Depot for the sale of Standard guaranteed preparations to mofussil Pandits and Dispensaries as the popularity of the ayurvedic system in the mofussil depends mostly on the facility to obtain the standard preparations at reasonable cost and within reasonable time

(3) to serve as a depot where the public in the City who obtain prescriptions from local pandits can secure the medicines easily.

The Committee desires to emphasise the need for developing the Pharmacy Section as the ayurvedic pandits have now no central stores to indent upon or even big firms in Mysore where all the standard medicines in the ayurvedic system are available

Resolved further that a qualified ayurvedic pandit from Malabar may be entertained in the vacant place of Pandit on Rs 60—4—80 to work in the Pharmacy Section. He will incidentally be able to demonstrate the methods of treatment current in Malabar.
